New Adjustable Stairs

Life just got
easier for
installing
stair railings!

Installing stair railings just got easier with the addition of Durarail's new Adjustable Stair Railing.

Collapsible, pre-assembled panels means no need to install individual pickets on site and no need to wait for the stairs to be built for measurement as they adjust to virtually any angle.

Easy to ship, stock and store, the adjustable stair railings collapse down to approximately 10" tall while adding only about 32" in length once fully collapsed.

Ideal for ramps, stairs, sloped decks and temporary rails that can be reused because of the installation flexibility.

Get peace of mind knowing you can easily order, stock and install these adjustable stair railings without the risk of inaccurate measurements - and you can do this in a fraction of the time it would take to install the individual pickets.

- Available in 6', 8' or 10' lengths
- Standard heights are 36" or 42" (custom heights are available on request)
- 5/8" picket
- Adjusts from a 0° angle up to an 80° angle in either direction (stairs are typically no more than 41°)
- Changes angles smoothly and does not rattle
- Available in all 5 top rail profiles
- Top and Bottom adjustable wall mounts can be used up and down for stairs OR side to side for custom angles on decks
- Adjustable stair mid post available for long runs
- Economical and convenient for shipping, storing and installation labor
